I am a MD Radiologist so have had a little more training in radioactive products than the average person along the street. Of course I totally support the proposed nuclear site in Victoria County. I hoped at first that it would be possible to see the site developed in my lifetime but now that does not seem possible. The site of that plant will be the safest area in Victoria County and if someone gave me a plot of land outside the front gate I would build my home on it in a flash. It will be such a protected area that wildlife will flourish. The Audubon Society conducts an annual bird survey during each December on the Jan Wellis Ranch across the RR tracks from the Exelon site. This site is included in the Guadalupe Delta-McFadden Ranch report. I predict that eventually there will be more individuals and species seen on that survey due to the protection the plant will afford. The water circulated in the system will be no more toxic than the hot water we bathe in every day. Again, I totally support this effort to supply us with clean, safe, affordable power.
