SUBJECT: PPG INDUSTRIES, INC., LICENSE AMENDMENT, CONTROL NO. 574061

Dear Ms. Baldauff:

This refers to your letter dated December 10, 2010, and the enclosed inventory of the gauges that you currently possess. Based on the inventory of the gauges, we have amended your license and revised Item 8.A accordingly. The new possession limit of cesium 137 also allows you to add a few additional gauges without requesting another amendment to increase the maximum possession limit. You are required to request and receive an amendment to your license prior to acquiring material in excess of the limits specified in Item 8 of the amended license. Enclosed with this letter is the amended license.

Please review the enclosed document carefully and be sure that you understand and fully implement all the conditions incorporated into the amended license. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region I Office, Licensing Assistance Team, (610) 337-5239, so that we can provide appropriate corrections and answers.

An environmental assessment for this action is not required, since this action is categorically excluded under 10 CFR 51.22(c)(14).

Current NRC regulations and guidance are included on the NRC's website at www.nrc.gov; select **Nuclear Materials; Medical, Academic, and Industrial Uses of Nuclear Material**; then **Regulations, Guidance, and Communications**. You may also obtain these documents by contacting the Government Printing Office (GPO) toll-free at 1-866-512-1800. The GPO is open from 7:00 a.m. to 6:30 p.m. EST, Monday through Friday (except Federal holidays).

E. Baldauff
