Andrea McGill-O'Rourke
Chief Operating Officer
Gifford Medical Center
Randolph, Vermont

RE: Gifford Medical Center
License #44-13976-01

03003295

I was informed today by Tera Benson, CNMT, Chief Nuclear Medicine technologist that Gifford Medical Center has terminated the agreement for radiology services, effective December 31, 2010. As part of this, I was informed that you will be appointing a new Radiation Safety Officer and new Authorized User(s).

This is to confirm that I will no longer serve as RSO effective December 31, 2010. As indicated, I am also informing by this letter the Nuclear Regulatory Commission of this license change. Although there was originally an agreement that I would assist in transition paperwork should the contract be terminated, I believe that the lack of appropriate notification to me voids that.

As part of this, the Authorized Users, Janusz Kikut, M.D. and Norman Sturtevant, M.D. are also to be removed from the license effective Dec 31, 2010.

Note that, to the best of my knowledge, radioactive materials may not be delivered to Gifford, nor used, without issuance of a license for which a Radiation Safety Officer and Authorized Users have been appointed. My understanding is that Ms Benson will be submitting necessary paperwork to accomplish this.

Marleen M. Moore, M.S.
