**SUBJECT: Additional Information to Control Number 573468**

Dear Ms. Casey:

This letter is provided as an additional information follow-up to control number 573468.

As the result of an August 27, 2010 materials license amendment request for ThyssenKrupp Waupaca (TKW) Plant 5 in Tell City, Indiana, two additional pieces of information were requested following NRC review. The first item was in response to a request to approve Randy Peterson as an Alternate Radiation Safety Officer for the facility. This request is being withheld by TKW at this time and will ultimately be pursued under separate cover.

The second piece of information requested related to a change in NRC's licensing policies that now require a declaration of finite possession limits for licensed material used by TKW. For material identified in material license subitem 8.A., TKW hereby declares a finite possession limit of 0.8 Curies. Additionally, TKW does not possess a single source that meets or exceeds the 0.27 Curie threshold.

If you have any questions regarding this information submittal, please feel free to contact Bryant Esch at 715-258-6611.

Sincerely,

A handwritten signature in black ink, appearing to read 'Bryant Esch', written over a horizontal line.

Bryant Esch  
Environmental Coordinator-RSO

cc: Angelica Guidry –Thermo Fisher Scientific  
Gary Greubel – TKW  
Randy Peterson - TKW
