Risk Significant / Emergent Activities:

C/16

Work on the excavation of the ASW piping adjacent to the SSF recommenced yesterday evening. Outside of Scope. Work started around 1030 but due to equipment and weather issues, actual excavation did not start until around 0400 today. The 1st existing header is partially exposed with plans to have all three fully exposed and 3 feet of soil beneath each removed to allow tie-in work to take place complete by late tonight. Tie-in work to start next week (this work will inop the SSF ASW pump for all three units and the LCO will be entered for this condition). The RI's are following the work under 1R12 (Maintenance Effectiveness) and the risk management / critical plan implementation under 1R13 (Risk Management).

Outside of Scope

9:15 mtg. Yes No
