Subject: RE: Review Request: telecon 1 11 2011, moly disulfide issue
Attachments: telecon 1 7 2011.doc

Lisa,

I have no comments on the conference call summary. I have verified with Engineering that the phased withdrawal of lubricants containing molybdenum disulfide for use on reactor head closure studs will be completed before entering the period of extended operation. Our PVAR number to phase out the lubricants containing molybdenum disulfide is 3413707.

Thanks,
Glenn

Glenn,
Please take a look at the attached and provide comments if necessary.
Thanks,
Lisa
