SUBJECT: INITIAL OPERATOR LICENSING OPERATING RETAKE TEST APPROVAL -
CALVERT CLIFFS NUCLEAR POWER PLANT

Dear Mr. Gellrich:

The purpose of this letter is to confirm the final arrangements for the upcoming operator licensing retake examination for the operating test at the Calvert Cliffs Nuclear Power Plant.

The NRC has completed its review of the operator license application submitted in connection with this retake examination and separately provided a list of the approved applicant to Mr. M. Draxton, Nuclear Training Manager. Note that any examination waivers have been addressed in separate correspondence.

The NRC has approved the subject operating examination in accordance with NUREG-1021, "Operator Licensing Examination Standards for Power Reactors," Revision 9, Supplement 1. The NRC staff will administer the operating retake test during the week of January 17, 2011. This examination has undergone extensive review by my staff and representatives responsible for licensed operator training at your facility. Based on this review I have concluded that the examination meets the guidelines of NUREG-1021 for content, operational, and discrimination validity. By administering this examination, you also agree that it meets NUREG-1021 guidelines, and is appropriate for measuring the qualifications of licensed operator applicants at your facility. If you determine that this examination is not appropriate for licensing operators at your facility, do not administer the examination and contact me at (610) 337-5046.

Please contact your Chief Examiner, Mr. D. Silk at (610) 337-5372, if you have any questions or identify any errors or changes in the license level (RO or SRO) or type of examination (partial or complete operating test) specified for each applicant.

Sincerely,

A handwritten signature in black ink, appearing to read "Samuel L. Hansell, Jr.", is written over the typed name.

Samuel L. Hansell, Jr., Chief
Operations Branch
Division of Reactor Safety
