Sattar,
Attached is a revised inventory list for Cobra's specific license 47-31260-01. The analyzer at our railroad loadout building is a Thermo Scientific CQM. This unit replaced the previous model that was damaged during the loadout building accident in 2009 if you recall.

The CoalScan 3500 is actually covered by our General License (GL-704398-15) as well as several gauges located throughout the preparation plant. I've included a separate listing of those gauges as well. Thank you for your patience.
