Washington DC 20555-0001

Dear Sirs,

Attached, please find the completed internal Corrective Action Report (CAR) initiated and reported by Hirschfeld Industries on December 14, 2010. We believe that this constitutes a potential safety-related issue for use in nuclear safety related applications and therefore reported it in accordance with 10 CFR Section 21.

As stated in the attached CAR, Hirschfeld has accounted for and quarantined all of the suspect material. Our client, Baker Concrete Construction (National Enrichment Facility, Eunice, NM), as well as our supplier of the steel, Gerdau Ameristeel of Midlothian, TX, have been notified of our findings and actions.

Should more information be required, please do not hesitate to contact the undersigned.

Sincerely

Alan Stanley
Director of Quality
Hirschfeld Industries
