Subject: Receipt of Strata's Ross ISR Material License Application

ADAMSAccessionNumber:ML110200013

Mr. Simpson:

On January 6, 2011, the U.S. Nuclear Regulatory Commission received the electronic submittal of Strata Energy, Inc.'s application for a new Materials License for the Ross uranium in situ recovery (ISR) project in Oshoto, Crook County, Wyoming. This email acknowledges receipt of the application and presents a general review schedule.

The electronic application has been placed into the agency's Agencywide Documents Access and Management System (ADAMS) under Accession No. ML110120063. (Note that the application will be made publically available after the information security review is completed by staff shortly.) At this point in time, staff will start the review process by initiating coordination activities with the U.S. Bureau of Land Management and interested Indian Tribes, and performing the requisite information security review; however, staff will not commence its formal acceptance review of the application until May 2, 2011. The staff expects to complete the acceptance review within 60 days or by July 1, 2011. At the time that the application is accepted, the staff will undertake a detailed technical review to be completed within 215 days of acceptance or by February 1, 2012.

If you have any questions, please contact me at 301-415-0697, or by email at john.saxton@nrc.gov.

Sincerely,

John Saxton
