License Amendment Request  
Request to Change Number of Barium-133 Sources Held at Facility

Dear Commission:

We would like to request a change to our NRC Radioactive Materials License. The change is in regards to condition 6 (K), that our approved limit be elevated to possessing eight (8) Barium-133 sealed sources, not to exceed 20 microcuries per source, opposed to four (4) sources. We have the need to expand our capabilities and add instruments to our facility, thus needing additional sources.

If you have any questions, please feel free to contact me at (314) 298-8566. Thank you for your help and guidance to implement the changes to the subject license.

Sincerely,

Michael J. Ridenhower
