Office of the Secretary  
 U.S. Nuclear Regulatory Commission  
 Washington, DC 20555  
 Attention: Rulemaking and Adjudications

*Sent via email to [hearingdocket@nrc.gov](mailto:hearingdocket@nrc.gov)*

DOCKETED  
USNRC

January 18, 2011 (3:30 p.m.)

OFFICE OF SECRETARY  
 RULEMAKINGS AND  
 ADJUDICATIONS STAFF

Docket Nos. 110-05896 and 110-05897

To Whom It May Concern:

Thank you for your recent letter extending the deadline for comment on EnergySolutions' combined import and export license IW029 and XW018.

An additional 119 HEAL Utah supporters have added their name to the following statement in opposition to this combined license import/export request:

*We, the undersigned members of HEAL Utah, urge the Nuclear Regulatory Commission to deny EnergySolutions' combined import and export license IW029 and XW018, to import and incinerate 1,000 tons of foreign nuclear waste in Tennessee and ship the resulting ash back to Germany. The import application was made available for public comment in a Federal Register Notice dated November 29, 2010.*

*Any import of foreign nuclear waste into our ports and transportation through our cities and towns presents an unacceptable risk to our health, safety, and security. Any country capable of generating nuclear waste should have the technical capability to manage and dispose of this nuclear waste. Apart from the financial gain of EnergySolutions, there appears to be no reasonable benefit incurred to the US and its citizens from the import, transportation, incineration, and re-export of this foreign nuclear waste. Indeed, this proposal only creates additional and unnecessary risks for US citizens.*

Please find the names and contact information of these individuals attached. Please do not hesitate to contact me if you have any questions.

Sincerely,

Christopher Thomas  
 Executive Director  
 HEAL Utah

*Engaging Citizens in the Effort to Protect Public Health from Nuclear and Toxic Waste*

Lisa Rutherford	173 Painted Hills Drive	Ivins	UTah	84738	her-n-me@appleaccess.com	Apparently those who wish to import foreign nuclear waste will not relent in their efforts to make money off this effort while the health of our people and our nation are put at risk. They perhaps fail to realize that we will not give up either in our work to challenge their flawed money-making business plans that line their pockets but present possible dire consequences for the rest of us. "Play ball" Energy Solutions, but play fairly!
