SUBJECT: Technical Specification Change Regarding Containment Building Penetrations During Refueling Operations
Waterford Steam Electric Station, Unit 3
Docket No. 50-382
License No. NPF-38

REFERENCES: 1. W3F1-2010-0010, Technical Specification Change Regarding Containment Building Penetrations During Refueling Operations, February 22, 2010 [ADAMS Accession No. ML100550136].
2. NRC Letter, ISSUANCE OF AMENDMENT RE : MODIFICATION OF TECHNICAL SPECIFICATION (TS) 5.3.1, FUEL ASSEMBLIES, TS 5.6.1, CRITICALITY, TS 6 9.1.11.1, CORE OPERATING LIMITS REPORTS, AND DELETION OF TS INDEX, May 9, 2005 [ADAMS Accession No. ML051290368].

Dear Sir or Madam:

Pursuant to 10 CFR 50.90, Entergy Operations, Inc. (Entergy) submitted a license amendment [Reference 1] to the Waterford Steam Electric Station, Unit 3 (Waterford 3) Technical Specifications (TS) to modify TS 3/4.9.4, "Containment Building Penetrations." The NRC identified during the review that Entergy had requested the NRC to review and approve a change to TS Index page IX to show that TS 3/4.9.9 "Containment Purge Isolation System" had been deleted. The TS Index had been previously moved to the licensee control under TS Amendment 200 [Reference 2] and does not require NRC review and approval.

The TS Index change included in reference 1 is for information only and will be controlled via the Waterford 3 10CFR50.59 program. The NRC is not requested to approve this TS Index change.

The letter contains no new commitments. If you have any questions or require additional information, please contact William J. Steelman at 504-739-6685.

Sincerely,

JAK/SAB
