Subject: Annual Report 2010

Date: 01/07/2011

Dear Deputy Director:

The purpose of this letter is to provide information on Humboldt Scientific, Inc. portable nuclear gauges that have been exported from the U.S. from January 2010 through December, 2010. These gauges all contain a 40 mCi sealed source of Americium-241 used to measure moisture in engineered materials (soil).

Please find attached a report containing the required information described in 10 CFR 110.23, including:

1. A description of the material, including quantity;
2. Shipment dates;
3. A list of recipient countries, end users, and intended use keyed to the items shipped.

Sincerely,

Mahir Al-Nadaf,
Vice President/RSO
