Subject: RE: Draft concurrence TIA

Thanks for this email, Jack. Please note that I intend to make this email a publicly available document in ADAMS as a means to demonstrate that we (NRR) obtained your (the Region III's) explicit approval to make your draft, unsigned TIA request a publicly available document by enclosing it to NRR's response.

I am putting everything in a concurrence package this morning. It appears we are still on track to have it signed out by the end of this week. I will inform you of any developments that could compromise this goal.

Thanks,
Barry

Barry Miller

Subject: Draft concurrence TIA

No changes are included in this draft.

Note: this draft is being used as a basis for an enclosure for the TIA response from NRR. Although draft, I expect this will be placed on the docket when the TIA is produced.

Barry, based on our discussion, this document goes into the enclosure as DRAFT and does not get signed.

Jack
