During determination of the extent of the condition described in Reference 3, NAC identified the MTR basket drawings as having similar issues of minor inconsistencies. These drawings have been revised and are included in this package. The revised drawings show the requested changes. Attachment 1 to this letter contains a list of all drawing changes made to the applicable MTR basket drawings.

Authorization is requested for a 12-month period to use TRIGA and MTR baskets manufactured in accordance with the revised drawings in the NAC-LWT cask. Authorization for the 42 MTR fuel base, intermediate and top basket modules (drawing Nos. 315-40-045, Rev. 5; 315-40-046, Rev. 5; and 315-40-047, Rev.5) is requested by August 27, 2008 to support scheduled shipment activities. Authorization for the TRIGA fuel basket base intermediate and top modules (drawing Nos. 315-40-070, Rev. 5; 315-40-071, Rev. 5; and 315-40-072, Rev. 5), as requested in Reference 4, and the remainder of the MTR fuel baskets (drawing Nos. 315-40-049, Rev. 5; 315-40-050, Rev. 5; and 315-40-090, Rev. 3; 315-40-091, Rev. 3; and 315-40-092, Rev. 3) is requested by September 5, 2008 to support an established shipment schedule. The requested changes have no impact on the TRIGA or MTR baskets performing their intended function nor do they invalidate any information presented in the NAC-LWT Safety Analysis Report.

NAC will include the above drawings in its next amendment request (ANSTO-HIFAR) for the model NAC-LWT cask for incorporation into the list of drawings in CoC Condition 5(a)(3).
