On June 7, 2013, the Director, Office of Nuclear Reactor Regulation, approved the publication of a *Federal Register* notice for a proposed rule to amend Title 10 of the *Code of Federal Regulations*, Section 50.55a, "Codes and Standards," to incorporate by reference American Society of Mechanical Engineers (ASME) Boiler and Pressure Vessel Code Cases and Operation and Maintenance Code Cases. This proposed rule would amend the Nuclear Regulatory Commission's regulations to incorporate by reference the latest revisions of the following three previously incorporated regulatory guides (RG) that approve code cases published by the ASME: RG 1.84, "Design, Fabrication, and Materials Code Case Acceptability, ASME Section III," Revision 36; RG 1.147, "Inservice Inspection Code Case Acceptability, ASME Section XI, Division 1," Revision 17; and RG 1.192, "Operation and Maintenance Code Case Acceptability, ASME OM Code," Revision 1. These incorporations by reference would supersede the incorporations by reference of RG 1.84, Revision 35; RG 1.147, Revisions 16; and RG 1.192, Revision 0, respectively. The NRC is requesting public comment on the three draft regulatory guides in a separate *Federal Register* notice published concurrently with the proposed rule.
