Thanks Steve. It helps. Is it correct to say then that the RAI is closed except for reviewer confirmation that the Confirmatory Items are incorporated into the next COLA revision? We can discuss on this morning's call.

Donald R. Woodlan

Manager, Nuclear Regulatory Affairs

Subject: RE: Chapter Reviews

The NRC lists RAI responses as Confirmatory items when it includes changes to the FSAR and we are waiting for the next revision to the FSAR to include such changes. Until these changes are implemented into the FSAR, the RAI remains in an open status, though no additional review occurs. Hope this explains the RAI status.

Thanks,
steve

Subject: Chapter Reviews

As the next step in preparing for Luminant's chapter reviews, I took your latest (1/24) COLA review status report and hid some columns. I highlighted in light green those cells for which we have no questions about status. Each cell in which we do have a question regarding status is highlighted in light yellow. This assists you in understanding exactly what information we need to complete our chapter review. Here are some examples:

Section 2.2.1-2.2.2 (Row #7) has yellow highlight in the second cell. This means we would like to know if RAI 30 is closed. Compare this Row #12, which is completely green. In Row #12, the specific statement is made that both RAI 3 and 157 are closed. There is not doubt about the status of those RAIs. That is the type of statement we are looking for in Row #7.

Rows #142 and #145 do not specify which items are confirmatory items, but other cells with confirmatory items do list them.

Row #13 does not specify the status of RAI 190.

We believe this will make it much easier for you to know exactly what information our chapter reviews consider to be missing. Don't think we might be able to send you markups of your status report or you might highlight cells in which you make changes each time you send us an update. Perhaps we can discuss in our phone call tomorrow.

Thanks,

John Conly
