Affidavit

In accordance with 10 CFR 2.390, "Public inspections, exemptions, requests for withholding," Rolls-Royce requests withholding from public disclosure of the documents listed in Table 1, which is attached to this affidavit. As required by 10 CFR 2.390, RRCN has included in Table 1 the following information:

- Identity of the document or part sought to be withheld;
- Declaration of the basis for proposing the information be withheld, encompassing considerations set forth in § 2.390(a);
- Specific statement of the harm that would result if the information sought to be withheld is disclosed to the public; and
- Locations in the documents of all information sought to be withheld.

As required in § 2.390(b)(4); Rolls-Royce wishes to note that the request for withholding from public disclosure applies to pages that contain commercially sensitive information that Rolls-Royce normally discloses only under a Non-Disclosure Agreement (NDA). This commercially sensitive information is not available in public sources and is the type of information customarily held in confidence by Rolls-Royce and our competitors. Rolls-Royce is transmitting this information to NRC in confidence.

As noted in Table 1, release of this information in a public forum could cause harm to Rolls-Royce by revealing trade secrets and/or commercially sensitive design and operational details and technical processes related to designing, building, and/or operating a *SPINLINE 3* digital safety instrumentation and control system.

As Rolls-Royce Civil Nuclear SAS Deputy Technical Director, I am responsible for reviewing the information sought to be withheld, and I am authorized to apply for its withholding on behalf of Rolls-Royce.

Best regards,

Jean-Pierre Burel
Deputy Technical Director
Rolls-Royce Civil Nuclear SAS

Software Configuration Management Plan for SPINLINE 3 Software Sub-assemblies Managed by CM Tool	1 208 878 E	Entire document (French text + English text)	Trade secrets and / or commercial information as per § 2.390(a)(4)	Rolls-Royce would be harmed by disclosure of its proprietary technical process for implementing safety software configuration management. This processes underpins the integrity of SPINLINE 3 software, which is an important competitive advantage for Rolls-Royce.	Entire document (see Note 3).

Notes:

- (1) In documents with significant non-proprietary content, the specific parts of the documents that contain proprietary information are denoted by double brackets (“[[]”)
- (2) As required in IN 2009-07, documents containing proprietary information are marked with the word “Proprietary” at the top of the first page of the document and at the top of each page containing such information.
- (3) As noted in IN 2009-07, in instances in which a nonproprietary version would be of no value to the public because of the extent of the proprietary information, the agency does not expect a nonproprietary version to be submitted.
