**Sent:** Friday, August 20, 2010 1:45 PM  
**To:** Reilly, Breeda  
**Subject:** AES Proposal for Authorization to Make Changes to License Commitments

Action related to MM-1, AES proposes to incorporate the following language:

*Authorization to Make Changes to License Commitments*

*1.2.5.5.1 Changes Requiring Prior Approval*

AES shall not make changes to the License Application that decreases the effectiveness of safety commitments, without prior NRC approval. For these changes, AES will submit to the NRC, for review and approval, an application to amend the license. Such changes shall not be implemented until approval is granted.

*1.2.5.5.2 Changes Not Requiring Prior Approval*

Upon documented completion of a change request for a facility or process, AES may make changes in the facility or process as presented in the License Application, or conduct test or activities not presented in the License Application, without prior NRC approval, subject to the following conditions:

1. There is no degradation in the safety commitments in the License; and
2. The change, test, or activity does not conflict with any condition specifically stated in the License Application.

Records of such changes shall be maintained, including technical justification and management approval, in dedicated records to enable NRC inspection upon request at the facility. A report containing a description of each such change, and appropriate revised sections to the License Application, shall be submitted to the NRC within three months of implementing

the change.
