Docket: NRC-2009-0279

Potential Changes to Radiation Protection Regulations; Solicitation of Public Comment

Comment On: NRC-2009-0279-0019

Radiation Protection Regulations and Guidance; Public Meetings and Request for Comments

Document: NRC-2009-0279-DRAFT-0027

Comment on FR Doc # 2010-24137

Submitter Information

General Comment

I have read through this document and feel that all it is trying to accomplish will not improve or making working with the material any safer or more efficient. We in the radiography field have been burdened with regulations that do not pertain to us and just add to the confusion of what to do and what is permitted to do. We in this industry have already put ALARA programs in place and it is working well. We are burdened by the fact our industry does not now have and are not getting the replacement people to come into our industry to perform the services we are now performing. When reading through the proposed document I find the only answer to the questions asked are "No Change in the current regulation". Please consider the cost of the changes proposed and the so called benefit of the change. To me their is none.
