

February 25, 2011

Michael Snee, Chief
Bureau of Radiation Protection
Ohio Department of Health
246 North High Street
Columbus, OH 43215

Dear Mr. Snee:

It was with great pleasure that I learned of your selection to the position of Program Director for the Ohio Radiation Control Program. Please accept my congratulations on your selection, and my very best wishes for your success in this position that plays a most important role in ensuring the health and safety of the citizens of Ohio. The U.S. Nuclear Regulatory Commission (NRC) and the Agreement States' joint efforts over the last several years have resulted in a strong and effective regulatory framework that provides a common baseline level of protection of public health and safety. I request your commitment and support going forward to ensure we continue our strong partnership and remain vigilant to safety and security issues.

The NRC looks to the Program Director to be the lead within the State of Ohio to implement the 274b Agreement under the Atomic Energy Act (AEA) to ensure public health and safety in the regulation of radioactive material in accordance with the provisions of section 274b.

We are placing you on a special mailing list so that on a regular basis you will receive copies of NRC documents and reports to keep you informed of matters that impact on States. Also, NRC participates in two meetings every year to meet with our counterparts in the Agreement States to discuss matters of mutual regulatory interest: the national Organization of Agreement States meeting and the Conference of Radiation Control Program Directors meeting.

Jim Lynch, our Regional State Agreement Officer in the NRC Region III Office located in Lisle, Illinois will be your main contact for routine communications at (630) 829-9661. In the event of his unavailability, please do not hesitate to call me at Headquarters or Duncan White of my staff at (301) 415-2598, concerning any questions you may have.

Sincerely,

/RA/

Robert J. Lewis, Director
Division of Materials Safety and
State Agreements
Office of Federal and State Materials
and Environmental Management Programs
