SUBJECT: NRC INSPECTION REPORT NO. 40-3392/2010-003 and 004

Dear Mr. Smith:

This letter documents my discussion with you and members of your staff on January 28, 2011, regarding the administrative closure of the subject inspection reports at the Honeywell Specialty Chemicals facility. Inspection hours were linked to these reports; however, the results of the inspections that were performed (i.e., strike coverage and emergency preparedness exercise) were actually documented in Inspection Reports 40-3392/2010-002 (ML103140705), dated November 10, 2010, and 40-3392/2010-006 (ML103190533), dated November 15, 2010. The results of the inspections were discussed with you and members of your staff at the exit meetings conducted from June 11, through October 21, 2010.

During these inspections, the NRC staff examined activities conducted under your license as they relate to public health and safety to confirm compliance with the Commission's rules and regulations and with the conditions of your license. Within these areas, the inspection consisted of a selective examination of procedures and representative records, observations of activities in progress and interviews with personnel.

You are not required to respond to this letter since your response to inspection reports 2010-002 and 2010-006 have already been submitted to the NRC.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter will be made available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.
