Subject: EPRI Reports Expected to be Submitted to the NRC in Fiscal Years 2011, 2012 and 2013
EPRI Project Number 689

Reference: Letter from Thomas B. Blount (NRC) to David J. Modeen (Director, External Affairs, EPRI),
"Request for List of Planned Topical Report Submittals for FY 011, FY2012, and FY 2013",
dated September 23, 2010.

The purpose of this letter is to formally provide a list of EPRI reports planned to be submitted to the NRC in the next few years.

Please note that the reports identified for submittal are our best understanding at this time of what is planned. However, changes will likely occur, especially for FY2012 since the work we perform is research and development, which has elements of uncertainty as to schedule and success. We have not identified any reports for FY2013 yet.

As requested by the NRC letter referenced above, the Attachment provides the following information: subject of the report, whether the report will be proprietary, if the report is expected to be submitted for NRC staff review or for information, if a fee waiver request is expected to be submitted, if it applies to existing plants, new plants or both, and lastly, the number of U.S. plants expected to use the report. Please note that EPRI/BWRVIP Report submittals were addressed in a letter from Dave Czufin, Chairman, BWR Vessel and Internals Project, to Mr. Blount, NRC, dated October 4, 2010.

If you have any questions, please contact me at 704-595-2670.

Sincerely,

David J. Modeen
