Rockville, MD 20852

Attention: Jonathan Rowley

Subject: Project No. 704 – LaSalle Station Unit 1 Surveillance Capsule Test Results Report

Reference: BWRVIP-86, Revision 1: BWR Vessel and Internals Project, Updated BWR
Integrated Surveillance Program (ISP) Implementation Plan, EPRI, Palo Alto, CA:
2008. 1006575.

The purpose of this letter is to provide an updated schedule for the BWRVIP to transmit the LaSalle Station Unit 1 120 degree surveillance capsule test report to the NRC.

The LaSalle Station Unit 1 120 degree surveillance capsule was removed from the reactor on February 12, 2010 in accordance with the BWRVIP Integrated Surveillance Program withdrawal schedule documented in BWRVIP-86, Revision 1, referenced above. Testing of the capsule contents will comply with the requirements of 10CFR50 Appendix H and will be completed by February 28, 2011. The final report will be completed and transmitted to the NRC no later than December 16, 2011. We are taking actions within the BWRVIP to improve the timeliness of testing and reporting this information in the future.

If you have any questions on this subject, please contact Chuck Wirtz (FirstEnergy, BWRVIP Integration Committee Technical Chairman) by email at cjwirtz@firstenergycorp.com or by telephone at 440.280.7665.

Sincerely,

Dave Czufin
