Doug,

All of the 7 documents and the CD set requested in this e-mail are in the NJ Reading Room. They were last updated as of March 2010 in the reading room, but are still the current revisions. Most were last updated when we collected two full years of Met data.

Please let me know if you have any questions.

Thanks,

Paul Snead

Paul,

Can you please supply the NJ Reading Room with the updated calculation packages? See below.

Thanks,

Doug

Doug -

Joe has reasonable EARRTH access to Rev 2 documents from the application. His biggest need is updated calculation packages from PEF showing how they got a new number for beta dose at the EAB. Have you worked out something for updated calc packages in his reading room?

Thanks,

Bob Scherpelz

All,

my quick review of ER section 5.4 indicates minor revision to doses and therefore I wish to view the calculation packages that were revised. One of the changes was to an EAB value.

cheers joe

Paul,

The HP SME would like to request that PEF send the following analytical support documentation and electronic files to the NJ reading room. He would like to review the information prior to the DEIS writing sessions scheduled for the last week in April.

LNG 0000 GLC -001

LNG 0000 GLC -002

LNG 0000 N5C -001 Dose to biota

LNG 0000 N5C -004 Gaseous Effluents Doses and Concentrations

LNG 0000 X7C -012 Aquatic Statistics and Cooling Water Discharges Dilution Factors

LNG 0000 X0C -001 Calculation of Population Distribution...

LNG 0000 N5C -003 Liquid Effluent Dose

s

Electronic files for NRC Dose, GASPAR II and LADTAP II runs that support analysis and findings presented in ER chapter 4 and 5 exposure estimate and demonstration of compliance.

Thanks,

Doug
