Subject: clarification of site acreage information and Parr Steam Facility status
Date: Tuesday, January 25, 2011 3:11:48 PM

April,

Per our clarification discussion today, please submit a brief statement to the docket to clarify the following:

1. Discussions in the NRC's environmental impact statement (EIS) regarding acreages for alternate sites should generally reference SCE&G's most recent response to US Army Corps RAI USACE-2 (NND-10-0022). In general, the information in this RAI response supersedes the information provided in Revision 2 of the Environmental Report for the VC Summer COLA.
2. The decommissioning status of the Parr Steam Facility and the status of any permits and licenses that have not yet been terminated. This clarification is needed to address a public comment on the draft EIS.

Thank you for your support of this request.

Sincerely,

Ryan Whited
Chief, Environmental Projects Branch 2
Office of New Reactors
USNRC
