RE: 13-15151-01

NRC Reference # 573828

Subject: Additional Information Requested

Dear Ms. Casey:

1. Per our conversation today I am providing the following information to clarify our original request from October 27, 2010
2. I will develop additional information to include the NRC 313A forms to support the items requested under Item 1 & 2 of the original request. These will be submitted as a new amendment request to the NRC as soon as I can collect the required data.
3. In regards to Item #3 of the original request. The request should have been to remove 35.400 from our license to include the Authorized User for this authority. I confirmed that we only utilized I-125 and PD-103 isotopes under this authority. None of these sources had any leakage at our facility. Per our conversation the close out survey was already provided and adequate.

I await your response confirming that the area of use under 35.400 is released for unrestricted use. The response can be emailed to my or faxed to 815-485-4433. Thank you for your assistance with this request.

Sincerely,

James Hatten
Radiation Safety Officer
