U.S. Nuclear Regulatory Commission
ATTN: Document Control Desk
Washington, DC 20555-0001

Docket No. 50-275, OL-DPR-80
Docket No. 50-323, OL-DPR-82
Diablo Canyon Units 1 and 2
Response to Request for Additional Information E-mail dated January 10, 2011, from the U.S. Nuclear Regulatory Commission (ME4290 and ME4291) Concerning the Diablo Canyon Power Plant, Units 1 and 2, Cyber Security Plan License Amendment Request 09-05

Dear Commissioners and Staff:

By letter dated July 22, 2010, Pacific Gas and Electric Company (PG&E) submitted a request to amend the Facility Operating Licenses DPR-80 and DPR-82, for Diablo Canyon Power Plant (DCPP) Units 1 and 2, respectively, for the DCPP Cyber Security Plan (CSP).

On January 10, 2011, the NRC sent an e-mail to PG&E with a request for additional information (RAI) regarding the DCPP CSP. The DCPP CSP deviated from the NEI CSP template provided in NEI 08-09, Revision 6. The version PG&E submitted on July 22, 2010, specified "program" rather than "policy or procedure" in Section 3.1.1. This deviation triggered the RAI. Specifically, the RAI asked for clarification in Section 3.1.1 of the CSP that PG&E will have "a formal, documented, cyber security assessment and authorization policy or procedure covering the listed topics under cyber security assessment and authorization."

PG&E commits to revising the DCPP CSP Section 3.1.1 to replace the term "program" with "policy or procedure," consistent with the template. This change will be included in the next revision of the DCPP CSP.

If you have any questions regarding this response, please contact Mr. Thomas Baldwin, Regulatory Services Manager, at (805) 545-4720.

I declare under penalty of perjury that the foregoing is true and correct.

Executed on February 8, 2011.

Sincerely,

James R. Becker for
Site Vice President
