SUBJECT: Notification of Delay for Initiating Activities Under NRC Materials License
Number 05-27748-01

Dear Regional Administrator:

MACTEC Development Corporation (MACTEC) provided written notification to the NRC in a letter dated January 20, 2011, of its intention to initiate licensed activities at a temporary job site, as required by NRC Materials License Number 05-27748-01, Amendment 3, Docket Number 030-36204, Condition 13. Due to unforeseen delays in the project schedule, a project start delay has occurred. It is anticipated that license activity at the project will not start any sooner than March 2, 2011.

Once the project schedule has been finalized and a firm start date is identified, notification will again be provided to the NRC. In addition to the written notification of license initiation, copies of applicable written agreements (Memorandum of Understandings) will be submitted along with the initiation notification.

Attached is a copy of the January 20, 2011 initiation letter, for clarity.

Thank you for taking this matter into consideration. If you have any questions regarding this notification, please call me at (970) 243-2861.

Sincerely,

Digitally signed by Michael McDonald

engineering and constructing a better tomorrow

January 20, 2011

U.S. Nuclear Regulatory Commission, Region IV
Attn: Director, Division of Nuclear Materials Safety
612 East Lamar Blvd., Suite 400
Arlington, TX 76011

SUBJECT: Notification of Initiating Activities Under Nuclear Materials License
Number 05-27748-01

Dear Regional Administrator:

MACTEC Development Corporation (MACTEC) is hereby providing written notification prior to initiating activities at a temporary job site, as required by Nuclear Materials License Number 05-27748-01, Amendment 3, Docket Number 030-36204.

MACTEC will be implementing its license to control radiological activities at the Hunters Point Shipyard (HPS), located in San Francisco, California, starting on or about February 4, 2011. Licensed activities will include the demolition of potentially radiological and dilapidated shoreline wooden structures comprising of Berths 61 and 64, Piers B and C, the wood portions of the quay wall adjacent to Pier C, and Wharf No. 2 between Dry Docks 2 and 3.

In accordance with the license requirements, the following information is provided:

13. A. (i) The estimated type, quantity, and physical/chemical forms of licensed materials include:

- There is an extremely small probability of locating radioactive material in the form of sealed tritium and/or radium luminescent deck/pier markers historically used to mark the U.S. Navy piers that are being demolished. There is no quantity estimate for these deck markers.
- The site's Sampling and Analysis Plan identifies cesium-137, plutonium-239, radium-226, strontium-90, and uranium-235 as contaminants of concern at the site; however, there is no quantity estimate for these radionuclides because the demolished material is expected to be free of residual radioactivity. If radioactive material is present, it is expected that the radioactive material would have a physical/chemical form of a fixed contamination, either on the external surface of the debris or imbedded in the physical debris material.

13. A. (ii) The specific site location is Berths 61 and 64, Piers B and C, the quay wall adjacent to Pier C, and Wharf No. 2 between Dry Docks 2 and 3 at the HPS, San Francisco, California.

13. A. (iii) Planned licensed activities include demolition, removal, radiological surveys, and disposition of all potentially radiological and dilapidated shoreline wooden structures including Berths 61 and 64, Piers B and C, the wood portions of the quay wall adjacent to Pier C, and Wharf No. 2 between Dry Docks 2 and 3. Radioactive waste material identified and collected by MACTEC will be placed in low-level radioactive waste bins provided by the prime contractor. After the bin has been filled or the project is completed, the bin will be returned to the prime contractor for management and disposition. Responsibilities for management and control of radioactive waste material will be performed in accordance with the prime contractor's Memorandum of Understanding.

13. A. (iv) The estimated start date is February 4, 2011, with an estimated finish date of July 2, 2011.

13. A. (v) The point of contact for this project is:

- Alejandro Lopez, MS, CHP
MACTEC Project Health Physicist

Mr. Torres,

Thanks for returning my call this morning. Attached is the letter I typed up to the Regional Administrator, regarding the project and license initiation delay.

Please call or email if you have any questions. Thanks.
