Subject: Thanks for the .pdf of the MOU

Alan,

Thanks for sending along the MOU in advance to this morning's call. I'm sure that the BLM leads in DC will be sending along advise via an instruction memorandum or instruction bulletin about the agencies entering into this MOU, how the offices in non-agreement states will implement it, and how we need to communicate information about it to the public and industry. The MOU and the IM or IB will likely be available via the National website (for instruction memorandum, this will be at website:

[http://www.blm.gov/wo/st/en/info/regulations/Instruction Memos and Bulletins/national instruction.html](http://www.blm.gov/wo/st/en/info/regulations/Instruction_Memos_and_Bulletins/national_instruction.html)

and for instruction bulletins, it would be at website:

[http://www.blm.gov/wo/st/en/info/regulations/Instruction Memos and Bulletins/national information.html](http://www.blm.gov/wo/st/en/info/regulations/Instruction_Memos_and_Bulletins/national_information.html)).

There may also be some kind of news release posted at:

<http://www.blm.gov/wo/st/en/info/newsroom.html>. I'll drop an email if I see any postings that may be of interest to you.

I would also appreciate knowing where the license amendments are posted at the NRC's website, and about how long it takes for license application and other information related to a docketed item to be posted to ADAMS. I find that there is a lot of good resource baseline information posted in the license application technical reports. Some of it could be incorporated by reference into a BLM generated environmental assessment or EIS.

I'm certain we'll be in contact soon.
