

**SAFETY INSPECTION REPORT AND COMPLIANCE INSPECTION**

1. LICENSEE/LOCATION INSPECTED:  <b>APAC – Missouri, Inc. P. O. Box 1117 Columbia, MO 65205</b>		2. NRC/REGIONAL OFFICE  <b>U.S. Nuclear Regulatory Commission Region III 2443 Warrenville Road, Suite 210 Lisle, Illinois 60532-4351</b>	
REPORT NUMBER(S) <b>2011-01</b>			
3. DOCKET NUMBER(S) <b>030-38163</b>	4. LICENSEE NUMBER(S) <b>24-32769-01</b>	5. DATE(S) OF INSPECTION <b>January 25, 2011</b>	

**LICENSEE:**

The inspection was an examination of the activities conducted under your license as they relate to radiation safety and to compliance with the Nuclear Regulatory Commission (NRC) rules and regulations and the conditions of your license. The inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector. The inspection findings are as follows:

- 1. Based on the inspection findings, no violations were identified.
- 2. Previous violation(s) closed.
- 3. The violation(s), specifically described to you by the inspector as non-cited violations, are not being cited because they were self-identified, non-repetitive, and corrective action was or is being taken, and the remaining criteria in the NRC Enforcement Policy, NUREG-1600, to exercise discretion, were satisfied

\_\_\_\_\_ Non-cited violation(s) were discussed involving the following requirement(s):

- 4. During this inspection certain of your activities, as described below and/or attached, were in violation of NRC requirements and are being cited. This form is a NOTICE OF VIOLATION, which may be subject to posting in accordance with 10 CFR 19.11

**Statement of Corrective Actions**

I hereby state that, within 30 days, the actions described by me to the inspector will be taken to correct the violations identified. This statement of corrective actions is made in accordance with the requirements of 10 CFR 2.201 (corrective steps already taken, corrective steps which will be taken, date when full compliance will be achieved). I understand that no further written response to NRC will be required, unless specifically requested.

<b>PROGRAM SCOPE</b>									
<p>The licensee is authorized to possess and use up to 12 Seaman Nuclear Model, C-200 or C-300 Series and 17 Troxler Model 3242 portable gauging devices (can be generally-licensed) at temporary job sites anywhere in the United States where the NRC maintains regulatory jurisdiction. The licensee is authorized by the license for 3 storage locations in Missouri. At the time of the inspection, the licensee possessed the number of devices as authorized by the license and are used on a weekly frequency during construction season in the vicinity of the authorized storage locations. The gauges are occasionally stored at a temporary job sites. The licensee has a total of 63 authorized gauge users with training certificates maintained by the RSO. At the time of the inspection, all gauges were in storage at the licensee’s facility with two tangible barriers. No temporary job site work was scheduled on the day of inspection, however, the RSO took the inspector to a nearby temporary jobsite in Columbia, MO to demonstrate storage and security procedures for a gauge when used and stored at a temporary jobsite. The inspector performed independent radiation measurements which indicated no dose concerns and consistent with expected readings.</p>									
<b><u>Performance Observations</u></b>									
<p>During this initial inspection, the inspector reviewed and discussed with the RSO: (1) Two tangible barriers for gauge security and padlocks while unattended and in storage at a temporary jobsite; (2) DOT requirements and shipping papers; (3) dosimetry; (4) leak tests; (5) survey meter availability and use; and (6) emergency procedures and reporting requirements.</p>
