Subject: DCD Introduction Wording Update for Registration of AP1000 Trademark

Westinghouse is submitting an update to the wording in the DCD Revision 18 Introduction. This DCD change is submitted in support of the AP1000 Design Certification Amendment Application (Docket No. 52-006).

The purpose of this change is to update DCD Revision 18 to indicate an update in AP1000 status as a Westinghouse registered trademark. This change, such as in the DCD Revision 19 (to be submitted), will be reflected only once in the DCD introduction when first referenced, to AP1000 with the "circle-R" to indicate a registered trademark. The subsequent words in a document referring to AP1000 thereafter in the DCD do not need to have the circle-R attached to AP1000.

No changes to existing Westinghouse documents submitted prior to this change, or NRC existing correspondence or safety evaluations need to be made. Westinghouse advises that the simple reference to "AP1000" in NRC future correspondence continues to be acceptable.

The information included in this letter is generic and is expected to apply to all COL applications referencing the AP1000 Design Certification and the AP1000 Design Certification Amendment Application.

The attached DCD markup page provides the wording updates to the Introduction text to reflect the registration of the AP1000 Trademark.

Questions or requests for additional information related to the content and preparation of this response should be directed to Westinghouse. Please send copies of such questions or requests to the prospective applicants for combined licenses referencing the AP1000 Design Certification. A representative for each applicant is included on the cc: list of this letter.

Very truly yours,

A handwritten signature in black ink, appearing to read 'R. F. Ziesing'.

R. F. Ziesing

Introduction

AP1000 Design Control Document

DESIGN CONTROL DOCUMENT INTRODUCTION

1.0 SCOPE AND PURPOSE OF THE DESIGN CONTROL DOCUMENT

This Design Control Document (DCD) is a repository of information comprising the AP1000^{SM(*)} Standard Plant Design. The design control document also provides that design-related information to be incorporated by reference into Appendix D to 10 CFR Part 52 (the AP1000 design certification rule).

Applicants for a combined license pursuant to 10 CFR 52 must ensure that Appendix D to 10 CFR Part 52 and the associated Statements of Consideration are used when making licensing decisions relevant to the AP1000 Standard Plant Design.

Further sections of this introduction summarize the contents and use of the design control document. The design control document contains this introduction, the Tier 1 Information and the Tier 2 Information for the AP1000 Standard Plant Design.

Detailed information on the application and use of the AP1000 design control document may be found in Appendix D to 10 CFR Part 52.

If there is a conflict between this introduction and the AP1000 design certification rule, the AP1000 design certification rule controls.

1.1 Tier 1 Information

Tier 1 means the portion of the design-related information contained in the AP1000 design control document that is approved and certified by the NRC. Tier 1 information includes:

- Definitions and general provisions;
- Design descriptions;
- Inspections, tests, analyses, and acceptance criteria (ITAAC);
- Significant site parameters; and
- Significant interface requirements between the AP1000 Standard Plant Design and systems that are wholly or partially outside the scope of the AP1000 Standard Plant Design

The Tier 1 Information includes a table of contents, a figure legend and an abbreviation list.
