Subject: DRAFT Generic Cyber Security RAI (ME4380)
Attachments: genericcyberRAIs.pdf

Bill,

By letter dated July 26, 2010, as supplemented by letter dated November 30, 2010, Omaha Public Power District requested an amendment to the Facility Operating License for the Fort Calhoun Station, Unit No. 1 (FCS) to approve the cyber security plan which provides an implementation schedule, and revises the license condition regarding physical protection to require FCS to fully implement and maintain in effect all provisions of the Nuclear Regulatory Commission (NRC)-approved Cyber Security Plan (CSP). The license amendment request (LAR) was submitted in accordance with Title 10 of the *Code of Federal Regulations*, Section 73.54, "Protection of digital computer and communication systems and networks." This LAR also withdrew the previous amendment request, submitted on November 16, 2009, on the same subject.

The NRC staff has reviewed your submittal and has determined that the information specified in the attached Request for Additional Information (RAI) is needed for the staff to complete its evaluation.

Please contact me if a clarifying teleconference is needed for the attached RAIs.

Thanks
Lynnea
