Subject: Comanche Peak RCOL Chapter 1 - RAI Number 206
Attachments: RAI 5549 (RAI 206).docx

The NRC staff has identified that additional information is needed to continue its review of the combined license application. The NRC staff's request for additional information (RAI) is contained in the attachment. Luminant is requested to inform the NRC staff if a conference call is needed.

The response to this RAI is due within **35** calendar days of February 25, 2011.

Note: If changes are needed to the safety analysis report, the NRC staff requests that the RAI response include the proposed changes.

thanks,

Stephen Monarque

Luminant Generation Company, LLC.
Docket No. 52-034 and 52-035
SRP Section: 01 - Introduction and Interfaces
Application Section: 1.0

QUESTIONS for USAPWR Projects Branch (NMIP)

01-5

Part 52, Section IV.A of a certified design rule typically states, "An applicant for a combined license that wishes to reference this appendix shall, in addition to complying with the requirements of 10 CFR 52.77, 52.79, and 52.80, comply with the following requirements," and three requirements are listed. Part 52, Section IV.A.3 requires that the plant-specific DCD shall include, the proprietary information and safeguards information referenced in the certified DCD. The purpose of this last requirement is to ensure that a combined license applicant has actual notice of and rights to proprietary and safeguards information, since this information is not contained in the public version of the DCD.

In order to ensure that Luminant has contractual rights to this information in the US-APWR DCD, Luminant is requested to revise the Comanche Peak Nuclear Power Plant, COLA, Part 2, FSAR, Chapter 1, Section 1.1, to include the following paragraph: "Unless otherwise specified, reference to the DCD refers to Tier 2 information and includes the references to the sensitive unclassified non-safeguards information (including proprietary information), and safeguards information referenced in the US-APWR DCD. Such DCD information is included in this combined license application in the same manner as it is included in the US-APWR DCD, i.e., references in the DCD are included as references in the FSAR and material incorporated by reference into the DCD is incorporated by reference into the FSAR. Appropriate agreements are in place to provide for possession (including constructive possession) and rights to use by the licensee of the withheld sensitive unclassified non-safeguards information (including proprietary information), and safeguards information referenced in the US-APWR DCD for the life of the project."
