SUBJECT: ENVIRONMENTAL REQUEST FOR ADDITIONAL INFORMATION LETTER 1102232 RELATED TO ESRP SECTION 9.3.1, SITE SELECTION PROCESS, FOR THE COMBINED LICENSE APPLICATION REVIEW FOR TURKEY POINT, UNITS 6 AND 7

Dear Mr. Nazar:

By letter dated June 30, 2009, as supplemented by letters dated August 7, 2009, September 3, 2010, and December 21, 2010, Florida Power and Light Company (FPL) submitted its application to the U.S. Nuclear Regulatory Commission (NRC) for combined licenses (COLs) for two AP1000 advanced passive pressurized water reactors in accordance with the requirements contained in 10 CFR Part 52, "Licenses, Certifications and Approvals for Nuclear Power Plants." The NRC staff is performing a detailed review of this application to enable the staff to reach a conclusion regarding the environmental impacts of the proposed action.

The NRC staff has identified that additional information is needed to continue portions of the environmental review. The staff's request for additional information (RAI) is contained in the enclosure to this letter.

To support the review schedule, you are requested to respond within 45 days of the date of this letter. If you are unable to provide a response within 45 days, please state when you will be able to provide the response. In the event the response submitted is incomplete, please indicate in the response when the complete response will be provided. If changes are needed to the final safety analysis report, the staff requests that the RAI response include the proposed wording changes. Your response should also indicate whether any of the information provided is to be withheld as exempt from public disclosure pursuant to 10 CFR 2.390.

If you have any questions or comments concerning this matter, you may contact me at 301-415-2828 or via e-mail at Andrew.kugler@nrc.gov.

Sincerely,

/RA/

Andrew Kugler, Sr. Project Manager

SRP Section: EIS 9.3.1 - Alternative Site Selection Process
Application Section: 9.3.1

QUESTIONS for Environmental Technical Support Branch (RENV)

EIS 9.3.1-1
The staff requests the following information to assist in describing the cultural environment for the St. Lucie alternative site. Provide any cultural resources investigation information and reports related to the recent discovery near Old Blind Creek, and the shell midden where 14 Native American burials were discovered. As described during the alternative sites visit on July 13, 2010, this information resulted from archaeologist investigations for a possible wind turbine site. There may have been other sites that were discovered during this investigation that contained artifacts such as pottery. Because this information pertains to work performed at the existing St. Lucie plant site, it should be available in FPL files.
