Dear Dr. Potters:

On November 30, 2010, Mr. Andrew Bramnik of the U.S. Nuclear Regulatory Commission (NRC) Region III Office contacted you to assist us by serving as a physician consultant with respect to the incident described in Enclosure 1. This letter confirms the agreement reached via telephone between Mr. Bramnik of my staff and yourself and provides the Charter detailing the tasks that should be completed under this assignment (Enclosure 2). (For Medical Events only, it is not the intent of the Medical Consultant Program to evaluate the appropriateness of the prescribed treatment, its medical effectiveness, or provide an opinion as to how the facility should operate.) If you encounter difficulty in completing these tasks or identify additional tasks that should be performed, please contact your NRC contact for this matter. This individual should also be contacted if you believe that your involvement in the case would result in a possible conflict-of-interest situation. In addition, please note the information in Enclosures 3 and 4 regarding medical consultant liability and service with other Federal departments or agencies. Please notify your NRC contact if you are currently performing work for other Federal departments or agencies.

It is our understanding, based on the agreement of November 30, 2010, that you have determined a site visit is not required. Please send a letter or e-mail documenting this decision and the basis for it to Mr. Bramnik of my staff. Your evaluation of the incident shall include a review of all pertinent documents available, regardless of whether an on-site visit is conducted.

Our office notified Liberty Hospital of your participation in this incident evaluation and has been asked to contact the individual's physician(s) and/or the referring physician regarding your involvement in the NRC activities.

Enclosures 5 and 6 contain a brief summary of the U.S. Department of Energy (DOE), Office of Epidemiology and Health Surveillance's Long-Term Medical Study Program. The DOE sponsors this life-time morbidity study of personnel involved in radiation incidents through the Radiation Emergency Assistance Center/Training Site of the Oak Ridge Institute of Science and Education. The NRC will provide information on the study to the individual's physician or referring physician, after it has investigated the incident; however, you may want to discuss this information with the individual's physician or the referring physician.

Please inform your NRC contact when you have completed the tasks specified in the Charter. It is our understanding, based on the agreement of November 30, 2010, that your case review will be completed by January 31, 2011. A report of your findings and conclusions (Enclosure 7 and Enclosure 8) shall be provided to us within 30 calendar days of the completion of the case review, unless there are extenuating circumstances that have been discussed with your NRC contact before the 30-day period ends. Please note that your report will be an official agency

record, and will be released to the public; therefore, it is important that all confidential information be kept out of your report.

Please follow the instructions provided in the Charter when preparing and submitting vouchers for reimbursement (Enclosure 9.) Please contact your NRC contact for this case if you decide to conduct an on-site visit as part of your evaluation of the incident. He can assist you in making travel arrangements through NRC's travel contractor.

Thank you for your assistance in this matter. The NRC contact for this case is Mr. Andrew Bramnik. You can reach Mr. Bramnik by telephone at (630) 829-9543, FAX (630) 515-1259, or by email at [Andrew.Bramnik@nrc.gov](mailto:Andrew.Bramnik@nrc.gov).

Description of Incident:

**On October 6, 2010, a patient was implanted with 79 palladium-103 seeds, (1.5 millicuries/seed) for a prostate brachytherapy treatment. The prescribed dose was 125 gray. The patient was partially paralyzed and therefore had difficulty with his legs being separated during the procedure. The physician indicated that this may be the reason that ultrasound images were distorted and the seeds were inserted outside the prostate gland. The licensee estimated that the actual dose delivered to the prostate was less than 13.5% of the prescribed dose. The licensee stated in their event notification to the NRC that the rectal dose was low and "similar to what is typically seen." The licensee indicated that they do not normally use fluoroscopy during a brachytherapy procedure. The licensee does not anticipate any adverse effects to the patient as a result of the misplaced brachytherapy seeds.**

**Patient and physician have been informed of the incident.**

**Patient information should be obtained directly from the licensee.**

## MEDICAL CONSULTANT CHARTER

### A. GENERAL INFORMATION

The U. S. Nuclear Regulatory Commission's (NRC's) authority and responsibility for conducting special inspections of radiation exposure incidents are provided under the Atomic Energy Act of 1954, as amended, and under the Energy Reorganization Act of 1974. The purpose of these inspections is to ascertain the facts and other related information surrounding the incident. This may involve the following tasks: determining the circumstances surrounding the incident and the root cause of the incident; evaluating the actions taken by the licensee at the time of the incident, in providing medical care to exposed persons; evaluating corrective actions taken by the licensee to preclude future similar incidents; verifying or estimating dose(s), to the exposed individual(s); evaluating the probable deterministic effects of the exposure; evaluating the notifications made by the licensee, and the licensee's follow-up plan, if available; and gathering evidence to support any necessary enforcement actions by NRC.

### B. SPECIFIC GUIDANCE AND TASKS TO BE PERFORMED

1. The **medical consultant shall not do** the following (as applicable to the specific situation):
  - a. Enter into a physician-patient relationship with the exposed individual.
  - b. Provide medical opinions or recommendations to anyone other than NRC, without NRC's written permission, unless compelled by legal process to do so. To minimize the risk of liability, any recommendations made by a medical consultant should be accompanied by a disclaimer that the recommendation is not a substitute for the professional judgment of any physician involved with, or responsible for, the patient's or individual's care.
  - c. Recommend a particular expert. The medical consultant may indicate that the services of an expert are needed, and if asked, the consultant may identify, after consultation with NRC management, sources for identification and location of such experts. Recommendations will be in accordance with 5 CFR 2635.702, which prohibits Federal employees from using public office for the endorsement of any product, service, or enterprise. Information on 5 CFR 2635.702 is available from the regional contact listed in the cover letter.
  - d. Divulge or make known to the licensee, individual, individual's physician, or referring physician any official findings or conclusions resulting from the NRC inspection, without NRC's permission.
  - e. Evaluate the appropriateness of the prescribed treatment or its medical effectiveness (medical events), or provide an opinion on how the facility should operate.
  - f. Volunteer advice to the licensee about corrective actions to be taken by the licensee.
  - g. Determine if an incident is a medical event.

2. The medical consultant shall do the following (as applicable to the specific situation):
  - a. Act for, and on behalf of, the Commission, to gather medical information for the evaluation of the effects of radiation exposure on those exposed to radiation.
  - b. Assist in NRC inspection/investigative activities related to radiation exposure incidents.
  - c. Provide the date of any on-site visits at the licensee's facility, to the NRC regional contact, as soon as a visit has been scheduled.
  - d. Gather information regarding the circumstances surrounding the incident, to assist in determining the root cause(s).
  - e. Provide a professional opinion/estimate on the magnitude of the radiation dose to the exposed individual(s), and the probable error associated with the estimation of the dose. If necessary, request that the licensee and/or individual's physician furnish information on bioassays, medical history, written directive, physical examinations, and other pertinent laboratory work, etc.
  - f. Assess any probable deterministic effects on the exposed individual(s).
  - g. Evaluate the medical data provided by each exposed individual's physician and interpret the results for the NRC regional office staff; keep the NRC regional or Headquarters staff informed (as appropriate) of the medical condition of the individual.
  - h. Evaluate the promptness and effectiveness of the licensee's immediate actions, in response to the incident, and corrective actions to prevent recurrence.
  - i. For medical events, gather information regarding the radiation dose actually received by the patient, as compared with the prescribed dose, to determine whether the medical event was medically or biologically significant.
  - j. For medical events, evaluate the licensee's notification to the exposed individual or individual's responsible relative or guardian or, alternatively, the licensee's reason for not informing the individual or individual's responsible relative of the medical event.
  - k. Review and evaluate the report (to individuals of exceeding dose limits) submitted by the licensee under 10 CFR 20.2205 (non-medical event) or 10 CFR Part 35 (medical event) to include an evaluation of the licensee's description of the incident, immediate actions taken in response to the incident, steps taken or proposed regarding long-term corrective actions to prevent recurrence, and the probable effects on the exposed individual.
  - l. Evaluate the licensee's plan for exposed individual follow-up, if available.
  - m. Prepare and submit, to the NRC regional office, a report of findings and conclusions, within 30 calendar days of completion of the case review and/or site visit, unless there are extenuating circumstances. These circumstances should be communicated to NRC regional management as soon as they are discovered. If information is discovered that is directly relevant to a potential violation of NRC regulations, it should be promptly communicated to NRC.

The report may be submitted on the "Medical Consultant Report" form. If the form is not used to submit the findings, you shall, at a minimum, address the items listed on the form.

- n. By no later than noon on the second Thursday of each pay period, complete and sign NRC Form 148, "Voucher for Professional Services." Provide details of the work performed during the pay period on Form 148 or complete a separate additional sheet. Send Form 148 and the summary of work performed via FAX to the FSME Coordinator. Within three business days of sending out the FAX, the consultant should mail (regular mail) the original signed Form 148 to the designated timekeeper for permanent retention.
- o. Complete and sign the NRC Form 148, "Voucher for Professional Services," along with a detailed summary of work assignments. The summary of work performed may be detailed directly on NRC Form 148 or it may be submitted on a separate sheet. Fax the signed NRC Form 148 and summary of work performed to the to the NRC regional contact by noon on the second Thursday of the pay period for which the requested tasks were completed. Mail the original signed Form 148 to the designated NRC HQ timekeeper within three business days of sending the fax.
- p. Prepare and submit NRC Form 64/64A, "Travel Voucher" (non-local travel) or SF1164, "Claim for Reimbursement for Expenditures on Official Business" (local travel) to the NRC regional contact for expenses incurred during days/hours worked in the region or Headquarters.

NOTE: The regional offices shall make travel arrangements through an NRC travel request (NRC Form-279).

- q. Prepare and submit SF 1034, "Public Voucher for Purchases and Services Other Than Personal," to the NRC regional contact, for administrative expenses other than those associated with salary and travel.
  - r. Furnish expert testimony at inquiries or hearings and participate in selected conferences on bioeffects of radiation and radioactive materials.
3. The medical consultant may consider doing the following:

Informing the referring or individual's physician of the U.S. Department of Energy, Office of Epidemiology and Health Surveillance's Long-Term Medical Study Program. This life-time morbidity study of personnel involved in radiation incidents is maintained by the Radiation Emergency Assistance Center/Training Site of the Oak Ridge Institute of Science and Education. Information on the study is attached to the confirmation letter.

NOTE: NRC will make the referring or individual's physician aware of the study if the consultant does not inform the physician.

## MEDICAL CONSULTANT LIABILITY

Medical consultants who are appointed as Special Government Employees are considered to be Federal employees. When a Federal employee is personally sued for a common law tort committed within the scope of employment, the United States will be substituted as the defendant pursuant to the Federal Tort Claims Act. Government counsel will defend the suit on behalf of the United States. The United States will be responsible for any damages that might be awarded. In addition, the consultant would have absolute personal immunity for injury or damage arising from common law torts. A Federal employee (including present and former employees) may also be provided personal representation by the Government in a proceeding in which he or she is sued, subpoenaed, or charged in his or her individual capacity, provided the actions for which representation is requested reasonably appear to have been performed within the scope of the employee's appointment, and representation is in the interest of the United States.

The consultant's provision of professional opinions and recommendations to the U.S. Nuclear Regulatory Commission does not constitute "practice of medicine" within the scope of State licensing laws, provided the consultant does not enter into a physician-patient relationship with the patient.

**RESTRICTIONS ON SERVICE WITH OTHER FEDERAL  
DEPARTMENTS OR AGENCIES**

An employee who serves two or more Federal Departments or agencies is required to inform each of his or her arrangement(s) with the other. If the individual's appointments are made on the same date, the aggregate of the estimates of the days of services will determine the decision, by each agency, as to whether the individual is "Regular" or "Special." If, after being employed by one department or agency, a Special Government Employee is appointed by another agency, the second agency must make an estimate of the individual's days of service for the remaining portion of the 365-day period which was initiated by the first appointment. The sum of the estimate and of the actual number of days of service to other departments or agencies, during the prior portion of such 365-day period, will determine whether the individual is "Regular" or "Special." Close coordination between the agencies and the appointee must be maintained to ensure that the 130-day limitation is not inadvertently exceeded.

**SUMMARY OF U. S. DEPARTMENT OF ENERGY, OFFICE OF EPIDEMIOLOGY AND HEALTH SURVEILLANCE'S LONG-TERM MEDICAL STUDY PROGRAM**

The Office of Epidemiology and Health Surveillance of the U. S. Department of Energy (DOE) sponsors a voluntary life-time morbidity study of personnel involved in radiation incidents, which is maintained by the Radiation Emergency Assistance Center/Training Site (REAC/TS). This study includes the gathering of clinical and epidemiological data at an early stage, after a significant exposure to radiation, and continues throughout the lifetime of the individual involved. The purpose of this study is to compile the best human radiobiological data available for improving immediate medical care, to develop the best prophylactic and anticipatory care for possible late effects, and to upgrade the basis for radiation risk estimates.

Personnel sought to participate in the study are those involved in a radiation incident or medical event during which one or more persons received radiation exposure that equals or exceeds the selection criteria listed in the accompanying table. If an individual is willing to participate in the study, direct contact with the individual will be made by the DOE contractor, at which time the details of the program will be explained fully, a consent form will be signed, and a schedule for future contacts will be arranged.

Generally, the follow-up program will consist of obtaining copies of all medical records associated with the treatment of the individual immediately after the incident and then annual contacts with the individual to follow his/her medical history. Initially, the types of information sought will include a complete medical history before and after the incident or medical event and copies of all relevant hospital, laboratory, and physicians' records covering the period of observation. The annual contact will be made to determine whether the individual has had any illnesses or physical examinations during the year and to obtain additional medical records as they appear to relate to the radiation exposure.

Participation in the follow-up program is totally voluntary and individuals may stop their participation at any time. The medical information obtained during participation is covered by legal constraints to protect the identity and privacy of living participants. Any expenses involved in providing medical records to the follow-up program are borne by the DOE long-term medical study program, not the individual. Any expenses for either short- or long-term medical care of the individual are the responsibility of the program participant and not the responsibility of DOE, Oak Ridge Institute for Science and Education, or REAC/TS.

Factual Description of Incident:

(Attach a copy of any reports, documents, etc. used/referenced in this description.)

The patient underwent ultrasound guided, Pre loaded Pd-103 brachytherapy for prostate cancer on 10/6/10 @ Liberty Hospital in Missouri. The operative note does not imply any issues associated with the operative position of the case or procedure.

A post-op CT scan was used to assess dosimetry and discovered inferior placement of many of the Pd-103 seeds, outside of the intended target, and in the pelvic floor/penile bulb.

Despite the lack of documentation, the licensee provided a statement that the patient had other medical conditions that limited his ability to be positioned correctly on the OR table.

Assessment of probable deterministic effects of the radiation exposure on the individual:

As of 11/3/10

To date, there has been no adverse effect of the radiation dose to the pelvic floor of this patient. This is clearly too early to expect any issues and more follow-up and monitoring is needed.

Over time, there may be no side effects. Or there may be several. He may become impotent & may develop a chronic pain syndrome of the pelvic floor. One note suggests he may now have surgery, since he was not effectively implanted. Any surgical side effects are a reflection or indirect of the poor implant.

Briefly describe the current medical condition of the exposed individual:

No information or follow-up was provided by the licensee other than on note a few weeks after the implant.

Was individual or individual's physician informed of Department of Energy (DOE) Long-Term Medical Study Program? Yes No

If yes, would the individual like to be included in the Program? Yes No

~~Official Use Only~~

1. Based on your review of the incident, do you agree with the licensee's written report that was submitted to Nuclear Regulatory Commission (NRC), pursuant to 10 CFR 20.2205 or 35.3045, in the following areas:
- a. Why the event occurred:  Yes    No
  - b. Effect on the individual:    Yes    No
  - c. Licensee's immediate actions on discovery:  Yes    No
  - d. Improvements needed to prevent recurrence:    Yes     No

2. In areas where you do not agree with the licensee's evaluation (report submitted under 10 CFR 20.2205 or 10 CFR 35.3045), provide the basis for your opinion:

The licensee provided a statement that he will use imaging differently and hopes this mitigates from a repeat event. He was asked for, but did not provide a copy of his policy & procedure manual for prostate brachytherapy. More He did not provide any written changes to that manual & implied none were made.

3. Did the licensee notify the referring physician of the medical event ?  
 Yes    No
- Did the licensee notify the individual or responsible relative or guardian?  
 Yes    No

4. If the individual or responsible relative or guardian was not notified of the incident, did the licensee provide a reason for not providing notification, consistent with 10 CFR 35.3045?    Yes    No

Briefly explain the licensee's response:

5. Provide an opinion of the licensee's plan for exposed individual follow-up, if available.

Additional follow-up of the individual was not provided, and no additional information about future follow-up was provided, so that I can not comment on any issues to date.  
My opinion is that the licensee remains circumspect regarding consequences and potential harm.
