**Subject:** ESTABLISHING MAXIMUM POSSESSION LIMITS FOR NRC LICENSE

License No.: 25-21249-01  
Docket No.: 030-20096  
Control No.: 574079

Dear Mr. Dillon:

Your Nuclear Regulatory Commission (NRC) license currently has "open ended" possession limits for the radionuclides that you possess. The NRC no longer writes its licenses in this manner. Please provide the total amount you wish to possess for each radionuclide listed on your license. You may wish to request a possession limit adequate to allow for the possession of a spare source(s) during replacement of the source in a device(s), to accommodate the future purchase of additional sources, and/or any sources and/or devices you may have in storage and not currently using.

The table below shows the source where more information is needed. Please insert an amount per source and a maximum possession limit for the radionuclide listed below:

Radionuclide	Manufacturer and Model Number	Amount per source	Maximum Possession Limit
A. Cesium-137	A. Sealed sources (Ohmart Model Nos. SR-2 & SR-1A; Ronan Model Nos. SA1 & SA8)		

**Please respond to this e-mail by Wednesday, March 9, 2011.** If you are unable to respond by this due date, please don't hesitate to contact me and we can discuss an extension to the date. You may respond by e-mail in PDF format. If you have any questions regarding this e-mail, please call me at 817-276-6596. When responding to this e-mail, please include the license, docket and control numbers located at the top of this page.

Thanking you in advance for your cooperation, assistance and prompt response in this matter.

Sincerely,

***Lizette Roldán-Otero, Ph.D.***
