United States Nuclear Regulatory Commission = Region III
2443 Warrenville Road Suite 210
Lisle, IL. 60532-4352

Materials License No. 24-25396-01

Mr. Herr:

Pursuant to our telephone conversation earlier today, I'm requesting an amendment to our firm's Materials License. Our firm has been awarded a large testing project that will require us to purchase an additional moisture / density gauge, therefore the total possession limits on the Materials License needs to be amended to:

Source:

Cesium-137 Cs-137

Limits: 18 mCi 0.296 GBq

Source:

Americium-241:BE AM241:EE

Limits: 88 mCi 1.48 GBq

We plan to purchase a Troxler model 3440, the same model as we currently own. I ask that the amendment process can be expedited as quickly as possible as the construction season will be quickly upon us.

I trust this information meets your need, if you have any questions or need additional information please contact me at your convenience.

Sincerely,

Wade Metcalf, RSO
