NUCLEAR POWER STATION, DOCKET NO. 50-271"

During the 581st meeting of the Advisory Committee on Reactor Safeguards, March 10-12, 2011, the Committee considered Supplement 2 to the Safety Evaluation Report (SER), NUREG-1907, for the Vermont Yankee License Renewal Application. Supplement 2 to NUREG-1907 documents the staff's review of additional information provided by the applicant incorporating recent industry operating experience as well as annual updates required by 10 CFR 54.21(b). The staff concluded that the supplemental information does not change the conclusion stated in the SER and that the requirements of 10 CFR 54.29(a) have been met. The Committee decided not to review Supplement 2 to NUREG-1907 and has no objection to the staff's proposal to issue the supplement.
