Edward L. Williamson  
Assistant General Counsel for Operating Reactors  
Office of the General Counsel  
Nuclear Regulatory Commission  
Washington, DC 20555-0001

Re: Watts Bar Unit 2 Nuclear Generating Facility - Request for Comments

Dear Mr. Williamson:

You have requested the comments of the Department of Justice on whether significant changes requiring an antitrust hearing have occurred since the last antitrust review of the Tennessee Valley Authority's (TVA) Watts Bar Unit 2 nuclear generating facility. You included with your request information concerning previous antitrust reviews of Watts Bar and the activities of the TVA since the most recent antitrust review.

Based on our examination of the information you submitted we have concluded that no significant changes requiring an antitrust hearing have occurred.

Sincerely,

Donna N. Kooperstein  
Chief  
Transportation, Energy, and  
Agriculture Section  
Antitrust Division
