LISLE, ILLINOIS 60532-4352

FEB 17 2011

Robert Wolyn, M.D.
Michigan Medical, P.C.
d/b/a Spectrum Health Medical Group
4100 Lake Drive SE
Kentwood, MI 49546

Dear Dr. Wolyn

Enclosed is Amendment No. 05 to your NRC Material License No. 21-32410-01 in accordance with your request. Please note that the changes made to your license are printed in **bold font**.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

Please note that your amendment is incomplete at this point and I have only added your new corporate name as a "doing business as (d/b/a)" name, in addition to your old corporate name, so as to ensure that these documents would reach you in the mail.

I was unable to complete your amendment because your letter dated November 19, 2010, states that your name changed as a result of the transfer of your assets to Spectrum Health Medical Group and that this change took place January 1, 2011.

This information was insufficient for us to evaluate your situation as a change of ownership and/or control, in accordance with the guidance in Appendix G to NUREG 1556, Vol. 9, Rev. 2, "Consolidated Guidance About Materials Licenses: Program - Specific Guidance About Medical Use Licenses" located on our website at:

<http://www.nrc.gov/reading-rm/doc-collections/nuregs/staff/sr1556/v9/r2/sr1556v9r2-final-appendices-a-h.pdf>

This information is excerpted below.

Please provide a written response, that is currently signed and dated, briefly and concisely, to each of the six items described, within 30 days of the date of this letter.

Please address your response to my attention at the above address and reference it as "additional information to control number 573994, to facilitate proper handling in our office. We will then continue our review.

"Information Needed for Transfer of Control"

The following information is taken from NUREG-1556, Volume 15, "Consolidated Guidance About Materials Licenses: Program-Specific Guidance About Changes of Control and About Bankruptcy Involving Byproduct, Source, or Special Nuclear Material Licenses."

Definitions

Control: Control of a license is in the hands of the person or persons who are empowered to decide when and how that license will be used. That control is to be found in the person or persons who, because of ownership or authority explicitly delegated by the owners, possess the power to determine corporate policy and thus the direction of the activities under the license.

Transferee: A transferee is an entity that proposes to purchase or otherwise gain control of an NRC-licensed operation.

Transferor: A transferor is an NRC licensee selling or otherwise giving up control of a licensed operation.

Licensees must provide full information and obtain NRC's *prior written consent* before transferring control of the license. Provide the following information concerning changes of control by the applicant (transferor and/or transferee, as appropriate). If any items are not applicable, so state. (emphasis added)

1. Provide a complete description of the transaction (transfer of stocks or assets, or merger). Indicate whether the name has changed and include the new name. Include the name and telephone number of a licensee contact whom NRC may contact if more information is needed.
2. Describe any changes in personnel or duties that relate to the licensed program. Include training and experience for new personnel.
3. Describe any changes in the organization, location, facilities, equipment, or procedures that relate to the licensed program.
4. Describe the status of the surveillance program (surveys, wipe tests, quality control) at the present time and the expected status at the time that control is to be transferred.
5. Confirm that all records concerning the safe and effective decommissioning of the facility will be transferred to the transferee or to NRC, as appropriate. These records include documentation of surveys of ambient radiation levels and fixed and/or removable contamination, including methods and sensitivity.
6. Confirm that the transferee will abide by all constraints, conditions, requirements, and

R. Wolyn

commitments of the transferor or that the transferee will submit a complete description of the proposed licensed program. Licensees must provide full information and obtain NRC's *prior written consent* before transferring control of the license."

I also noted that your letter dated November 19, 2010, was addressed to our former location at "801 Warrenville Road, Lisle, IL 60532-4352."

Please update your records to reflect our current location at "2443 Warrenville Road, Suite 210, Lisle, IL 60532-4352." We relocated in April 2004 and advised all of our licensees of our move at that time and in our correspondence with you since then.

Please address any questions you may have concerning this amendment to me at (630) 829-9841. My fax number is (630) 515-1078.

In accordance with 10 Code of Federal Regulations 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

Sincerely,

Colleen Carol Casey
Materials Licensing Branch
