Subject: Amendment Request for License Number 11-27610-01

Qal-Tek Associates requests the following items be deleted or changed in our Materials License, 11-27610-01. Business projections have not developed as originally anticipated; hence these authorizations are not needed.

Item 9.A. and B. (5.) Research and development --- delete in its entirety. We do not perform R & D with radioactive materials.

Item 9.C. Delete the words "For use as shielding." -- We found the use of depleted uranium as shielding impracticable without modifications of existing fabricated shields for specific application or working uranium materials to produce shields. Neither of these options are practical at present and our company has no intent to use uranium as shield material other than occasional receipt of radioactive sources in U shields from clients for repackaging. These client shields become items for disposal.

All other conditions of our license should remain unchanged.

Sincerely

Anthony R. Borland
Radiation Safety Officer
