

March 24, 2011

Dr. Said Abdel-Khalik, Chairman
Advisory Committee on Reactor Safeguards
U.S. Nuclear Regulatory Commission
Washington, DC 20555-0001

SUBJECT: RESPONSE TO THE ADVISORY COMMITTEE ON REACTOR SAFEGUARDS
REPORT ON THE SAFETY ASPECTS OF THE LICENSE RENEWAL
APPLICATION FOR THE PALO VERDE NUCLEAR GENERATING STATION

Dear Dr. Abdel-Khalik:

During the 580th meeting of the Advisory Committee on Reactor Safeguards (Committee), held on February 10-12, 2011, the Committee completed its review of the license renewal application for the Palo Verde Nuclear Generating Station, Units 1, 2, and 3 (PVNGS), and the associated final safety evaluation report prepared by the U.S. Nuclear Regulatory Commission (NRC). In the Committee's final report, dated March 1, 2011, the Committee recommended renewal of the PVNGS operating licenses. The NRC staff appreciates the Committee's thorough review of the plant's license renewal application and the associated final safety evaluation report. In particular, the Committee's review of aging management programs for fatigue monitoring, inaccessible medium voltage cables, small-bore piping, and buried piping and tanks were particularly helpful as the NRC staff finalized its evaluation.

The NRC staff recognizes the Committee's commitment to safety and appreciates its continued support of the license renewal process.

Sincerely,

/RA by Martin J. Virgilio for/

R. W. Borchardt
Executive Director
for Operations

Docket Nos. 50-528, 50-529 and 50-530
