S. F. Appliance Limited
ATTN: Mr. K. G. Calaway
Vice President.
613 W. Washington Street
Morris, IL 60450

Gentlemen:

This refers to your letter dated October 31, 1979, concerning License No. STB-258.

If you will import gas mantles, you would be exempt from the requirements for a license to possess them pursuant to Section 40.13(c)(1)(i), 10 CFR Part 40. You would also be exempt from the requirements for an import license pursuant to Section 110.11, 10 CFR Part 110.

When you have transferred all the thorium oxide and completed gas mantles as specified and provided us with the results of a survey of your facility including the efforts you have made to decontaminate to as low a level as possible, we will consider your application for license termination. In the meantime, License No. STB-258 will remain in effect as specified in our February 6, 1979, letter.

Sincerely,

Nathan Bassin
Material Licensing Branch
Division of Fuel Cycle and
Material Safety

Enclosures:

1. 10 CFR Part 40 *and 110*
2. Decontamination Guide
