Reference: 75608

Dear Mr. Patterson:

We are in receipt of your letter dated February 17, 1984 and submit the following information in response to your request.

1. Be advised that radiation contamination surveys will be performed on a quarterly basis. The surveys will be performed in conjunction with a physicist consultant.
2. The actual levels of decontamination procedures to be initiated are as follows:
 - a. surface contamination-exceeding determined background level. The background level will be determined within the facility.
 - b. Air borne-levels exceeding determined background within the facility.

In the event surface contamination is detected, the total contaminated surface is determined and decontamination procedures are initiated after consultation with our physicist consultant. The area is not released for routine use until a determination is made that radiation levels are within acceptable limits and the cause for the contamination is determined.

In the event air borne contamination is determined, the area which the air-borne contamination is found may be sealed off and the cause of the contamination determined. Any type of decontamination procedure to be initiated will be determined by the physicist consultant.

3. Please note that in No. 1 that the surveys to be performed are performed in conjunction with a consultant physicist. The firm that we currently utilize is Radiation Protection Consultants, Ltd. located at 710 East Ogden Avenue. Suite 106 Naperville, IL 60540.

A-72

U.S. Nuclear Regulatory Commission
Mr. James W. Patterson

Their NRC License No. is 12-13370-01.

Thank you for your cooperation in this matter. If you should have any additional questions or require any additional information, please contact Mr. Ronald D. Edwards, Physicist, of Radiation Protection consultants, located at 710 East Ogden Avenue, Suite 106, Naperville, Illinois, 60540. His telephone number is 312-369-6488. Mr. Edwards is authorized to answer any questions or provide any additional information you may need regarding our license or any amendment application.

Very truly yours,

Bonnie J. Joneson
Radiation Safety Officer
Sunflame Appliances, Ltd.
