RE: License No. STB-258

Gentlemen:

In follow-up to our meeting on April 23, 1986 concerning your request for a "short term" plan of action we propose to implement regarding contamination levels in and around our facilities, we submit the following:

1. S. F. Appliances, Ltd. is negotiating with the neighboring land-owner to purchase the adjacent strips of land which were found by Oak Ridge (ORAU) to contain thorium concentrations above NRC limits for unrestricted areas. Compliance with this item will be complete upon transfer of land ownership.
2. The four areas in which removable contamination was found by ORAU to exceed 200 dpm/100 cm<sup>2</sup> will be cleaned thoroughly by S. F. Appliances, Ltd. personnel and resurveyed for an action level of 200 dpm/100 cm<sup>2</sup> transferable. Compliance with this item will be completed by June 30, 1986.
3. The ventilation system for the mantle processing step (burn-off) will be modified to include a filtering system which is sufficiently efficient to maintain effluent levels of thorium in accordance with NRC 10 CFR Part 20 limits. Compliance with this item will be complete by August 31, 1986.
4. We also confirm that S. F. Appliances, Ltd. will submit a license renewal application by July 31, 1986.

We trust this information is sufficient to meet your needs at this time. Should additional information be needed, please contact Standard Nuclear Consultants, Ltd. directly at (312) 244-7388.

365-5858

Sincerely,

Ronnie Joneson
