**LEVY NUCLEAR PLANT, UNITS 1 AND 2
DOCKET NOS. 52-029 AND 52-030
VOLUNTARY RESPONSE TO LNP COLA INFORMATION CONCERNING ONSITE TOXIC
CHEMICALS**

Ladies and Gentlemen:

By letter dated July 28, 2008, Progress Energy Florida (PEF) submitted an application for combined licenses (COL) for proposed Levy Nuclear Plant (LNP) Units 1 and 2, to the U.S. Nuclear Regulatory Commission (NRC) for two Westinghouse AP1000 reactor plants, in accordance with 10 CFR Part 52. As a result of a detailed review, PEF is revising the LNP COLA to address consistency of toxic chemicals used on site in the COLA sections 6.4 and 10.4, concerning ammonium bisulfite. Progress Energy Florida, Inc. (PEF) hereby submits information to the Nuclear Regulatory Commission (NRC) to address an additional change to COLA section 10.4.

The second paragraph in the section with the left margin annotation marked as "LNP COL 10.4-1 LNP COL 10.4-3" will be deleted from the LNP COLA page 10.4-5:

"Ammonium Bisulfite solution may be injected into the blowdown as required to reduce the oxidant level in the blowdown before discharge."

This change will provide consistency between COLA sections 6.4 and 10.4 with Table 6.4-201. If you have any further questions, or need additional information, please contact Bob Kitchen at (919) 546-6992 or me at (727)-820-4481.

I declare under penalty of perjury that the foregoing is true and correct.

Executed on March 11, 2011.

Sincerely,

A handwritten signature in black ink, appearing to read "John Elnitsky".
