Attachments: Meeting Summary.pdf

Bill,

Per our discussion this afternoon I understand that you agree that the DNC statements provided in the attached draft meeting summary are accurate with the exception of the statements that DNC agreed to provide either the thresholds being developed for regulatory correspondence or the percentage of licensing activity related condition reports that were self-revealing and NRC identified vice DNC identified.

I have spoken with Harold and compared meeting notes and we agree that DNC representatives did not agree to provide the thresholds being developed for regulatory correspondence. The NRC staff's intent in meeting discussions concerning this point was to ascertain from DNC personnel the percentage of licensing activity related condition reports that were self-revealing and NRC identified vice DNC identified. However, if you do not share the staff's recollection on this point, then we will be willing to remove that statement from the meeting summary and pursue that information through the NRC residents in inspection space.

Thank you,
John

Bill,

I have attached the DRAFT meeting summary for the February 15, 2011, public meeting. I am asking you to review the summary and provide feedback on the accuracy of DNC's statements.

Thank you,

Carleen Sanders
Millstone Project Manager
