FEB 25 2011

Dwight B. Beery, Ph.D.
Radiation Safety Officer
Manchester College
North Manchester, IN 46962

Dear Dr. Beery:

It has come to our attention that an omission existed in Amendment No. 08 to your NRC Material License No. 13-00267-04. This omission has been corrected by the addition of a total possession limit in Item 8.B. in the enclosed Corrected Copy of License Amendment No. 08.

Due to a change in NRC's licensing policies, we must obtain possession limits for all materials listed on your license. As we discussed by telephone on February 15, 2011, we have listed a possession limit for any byproduct material activation products as 10 nanocuries per radionuclide with a total possession limit of 20 nanocuries in Item 8.B.

NRC's Regulatory Issue Summary (RIS) 2005- 31 provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through ADAMS, the NRC's electronic document system. Pursuant to NRC's RIS 2005-31 and in accordance with 10 CFR 2.390, the enclosed license document is exempt from public disclosure because its disclosure to unauthorized individuals could present a security vulnerability. The RIS may be located on the NRC Web site at: http://www.nrc.gov/reading-rm/doc-collections/gen-comm/reg-issues/2005/ri200531.pdf and the link for frequently asked questions regarding protection of security related sensitive information may be located at: http://www.nrc.gov/reading rm/sensitive info/faq.html. A copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at http://www.nrc.gov/reading-rm/adams.html (the Public Electronic Reading Room).

Please contact me at 630-829-9839 if you have any questions.

Sincerely,

William P. Reichhold
